

TAPAK LAMAN WEB

Sebenarnya korang ada pilihan, nak simpan web (*webhosting*) korang ni dalam web server yang free ataupun yang berbayar. Kenapa nak simpan? Habis tu... korang nak tengok sensorang je? Kalau dah nak berkongsi ngan orang lain tu, kena la kita simpan dalam komputer yang semua orang boleh masuk (*capai*), dalam kes ni kita simpan dalam web server la.

Kita tengok yang percuma dulu. Biasanya kalau yang percuma ni, mesti banyak kekurangan. Antaranya, syarikat tu nanti akan sesuka hati tampalkan iklan dalam website kita. Kat sini aku nak rekemen (*recommend*) web:

Done

Antara kelebihanannya ialah:

- percuma
- saiz simpanan besar – 250Mb
- laju – 100 Gb
- Sokong bahasa server PHP dan database MySQL

Untuk daftar, klik butang *Sign Up!* :

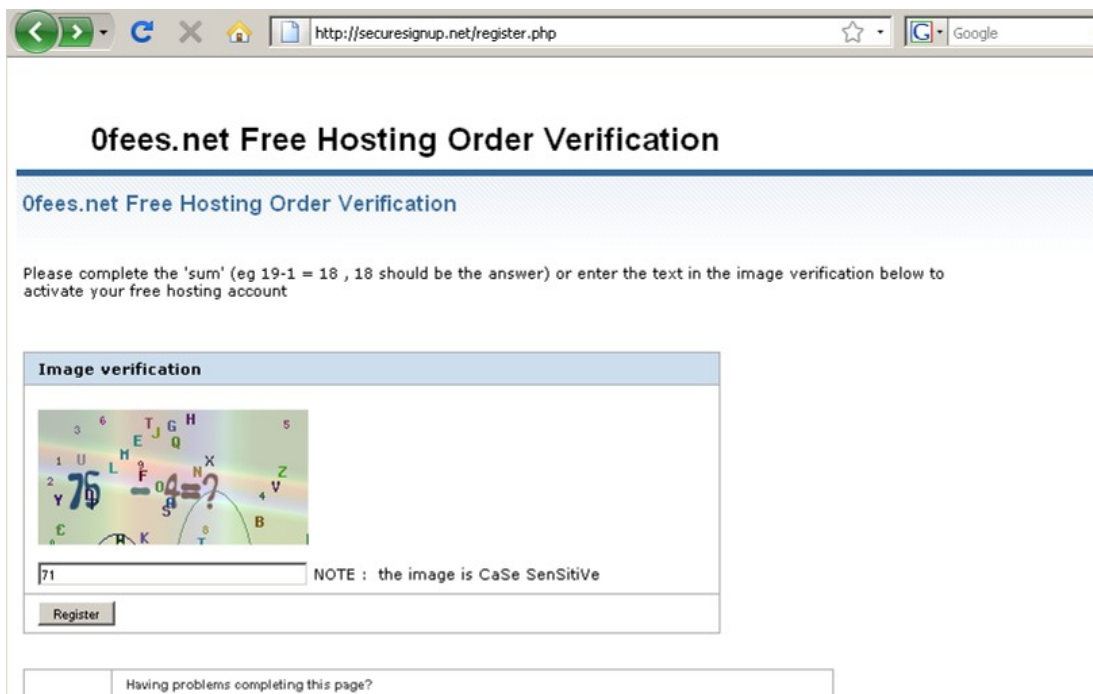

Masukkan butir diri dan klik *Register*:

Sign Up Now!

Username	<input type="text" value="banjarhensem"/>
Password	<input type="password" value="••••••••"/>
Email Address	<input type="text" value="hjarhensem@gmail.com"/>
Site Category	<input type="text" value="Hobby"/>
Site Language	<input type="text" value="Non-English"/>
Security Code	A 5 9 D F
Enter Security Code	<input type="text" value="a59df"/>

By signing up for free hosting, you accept and agree to our [Terms of Service](#)

Masukkan kod pengesahan, dan klik *Register*:

Download maklumat akaun anda sebagai rujukan:

0fees.net signup

Free Hosting Order Confirmation

Congratulations your free hosting account has been created!

Please print this page for your records. We highly recomend you [download](#) a copy of your account information.

Subscription To	Terms	Amount
Free Hosting Plan	\$0.00 USD for each month	\$0.00 USD

Control Panel	
Control panel user name	rahsia
Control panel password	rahsia2
Control panel URL	http://cpanel.0fees.net

Files and FTP Settings	
FTP user name	rahsia3
FTP password	rahsia4

Menggunakan maklumat daripada fail yang anda download tadi, cuba buka alamat website ada yang baru dibina:

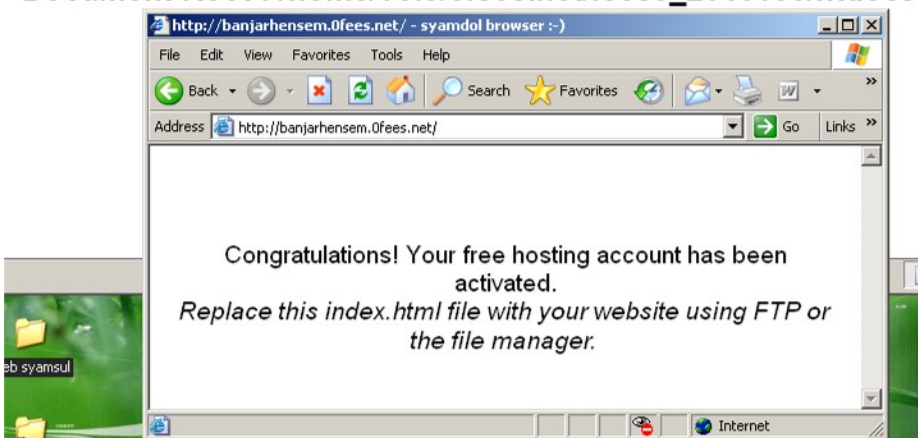

FTP Server: ftp.0fees.net

FTP Username (FTP/SQL): rahsia3

FTP Password (FTP/SQL): rahsia4

Website URL: <http://banjarhensem.0fees.net>

Document Root : /home/vol5/0fees.net/fees0_2013136/htdocs

Domain Name

Untuk memudahkan orang lain jumpa web kita di internet, pastikan alamat web kita (*Domain Name*) mudah ditaip dan mudah diingat! Sebagai contoh:

Alamat asal: <http://banjarhensem.0fees.net>

Ubah kepada: <http://www.budakweb.co.cc>

Kita akan gunakan konsep *Domain Forwarding*; Bermaksud kita akan guna alamat lebih ringkas (atau menarik) yang akan dipetakan kepada alamat asal web kita yang panjang dan tak menarik ☺ ??? Tak faham? Maksudnya... kita masih lagi guna alamat asal *domain* kita, Cuma bila orang lain nak cari website kita, dia tak perlu taip alamat panjang tu lagi, sebaliknya taip je alamat yang da diringkaskan. Persoalan; Siapa yang ringkaskan? Kita guna salah satu perkhidmatan percuma yang ada:

Buka web: <http://www.co.cc>

Masukkan alamat yang korang cadang nak guna (contohnya *budakweb.co.cc*) dan klik *Check availability* untuk semak sama ada nama tu boleh digunakan atau tak:

The screenshot shows the CO.CC website interface. At the top, there's a navigation bar with links for 'Domain Settings', 'Getting A New Domain', 'Directory', and 'Referrals'. A 'Check availability' button is highlighted with a red circle. The main content area features a large heading: 'Get a cool, simple and FREE CO.CC domain!' followed by 'co.cc supports for CNAME, A, MX, NS records!'. Below this is a search input field containing 'www. budakweb .co.cc' and a 'Check availability' button. To the left, there's a sidebar with 'CO.CC Stats' (Members: 247,037, Affiliates: 19,450, Domains: 302,427, Zones: 149,874, Records: 228,113) and a 'Set up' section with links for 'My profile', 'Security Setting', 'Manage domain', 'Delete domain', and 'Delete account'. At the bottom, there's a 'Domain Mapping and CO.CC' section explaining the process of pointing a registered domain name to a blog or photo album.

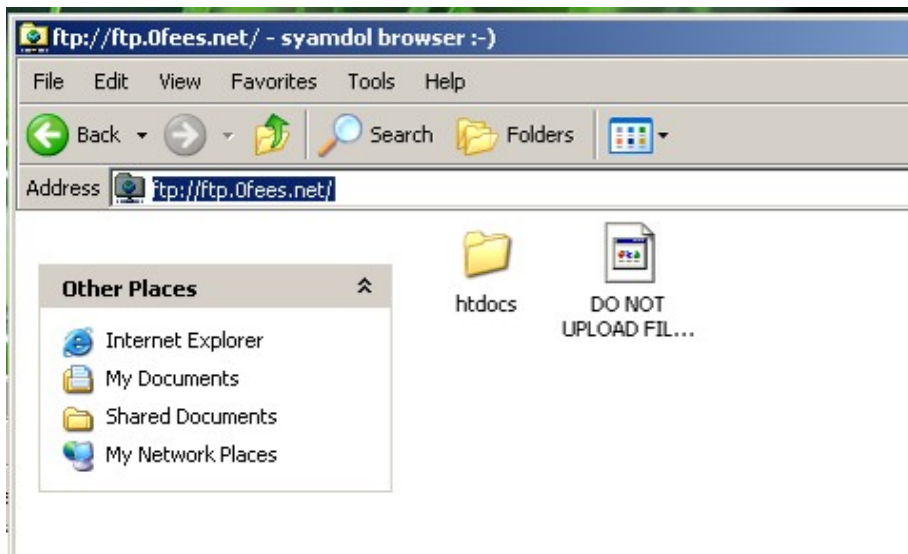

Jika ada, klik *Continue Registration* untuk daftar akaun.

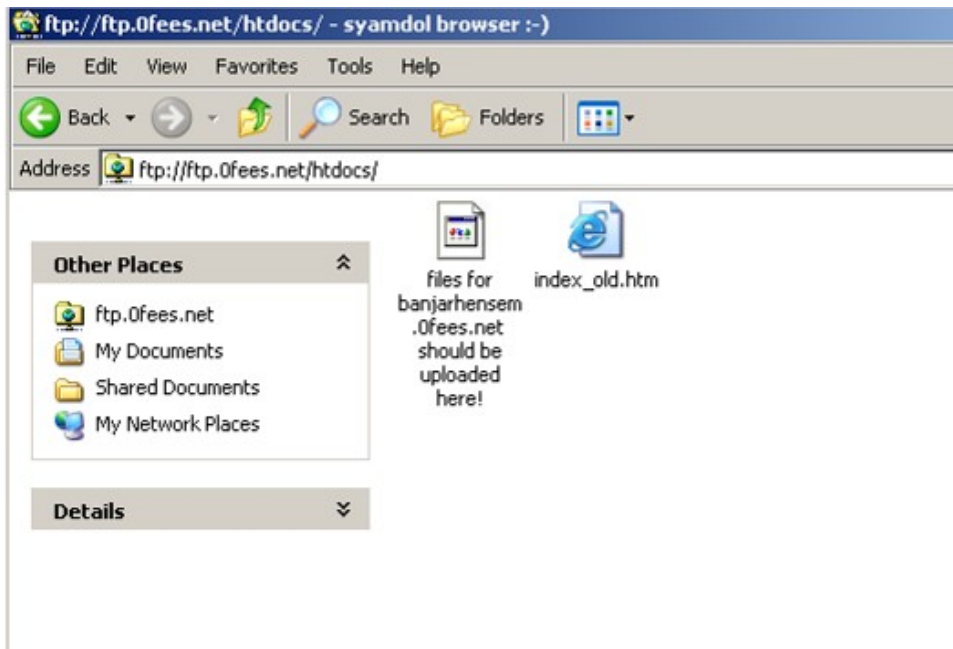

Masukkan butiran web asal anda pada ruang yang disediakan dan tetapkan co.cc untuk menutup alamat asal web kita kepada alamat baru.

Upload Fail ke Server Web

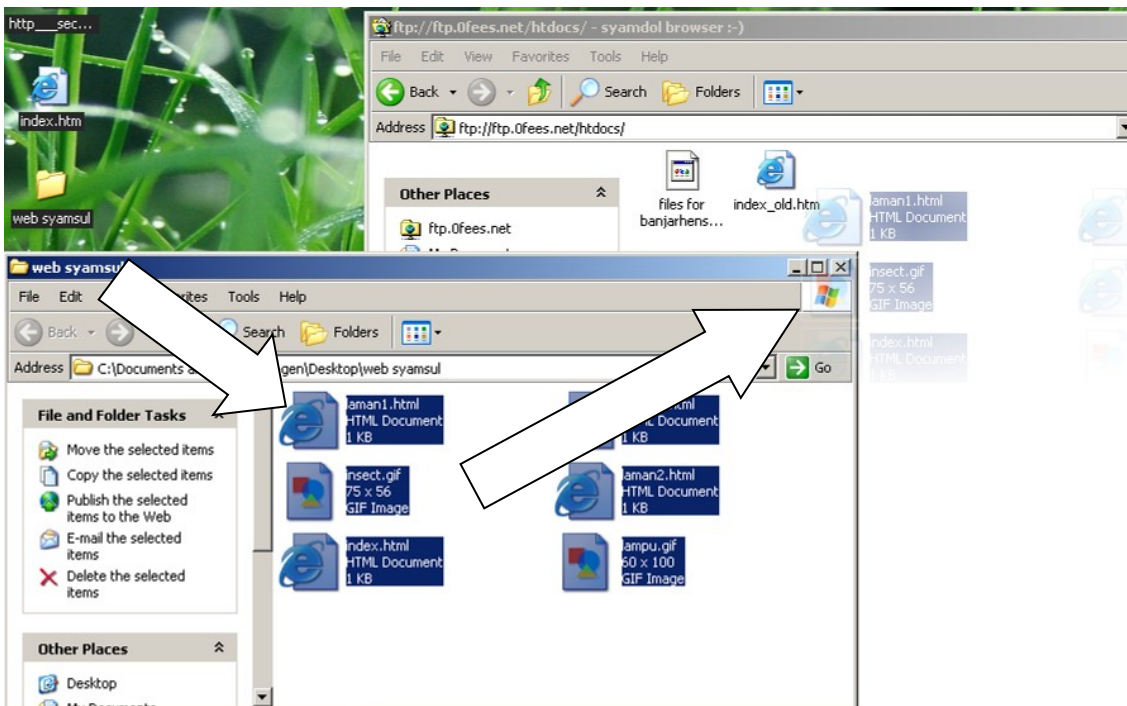

Buka alamat FTP yang dibekalkan (contohnya: <ftp://ftp.0fees.net>) dan masukkan nama dan password.

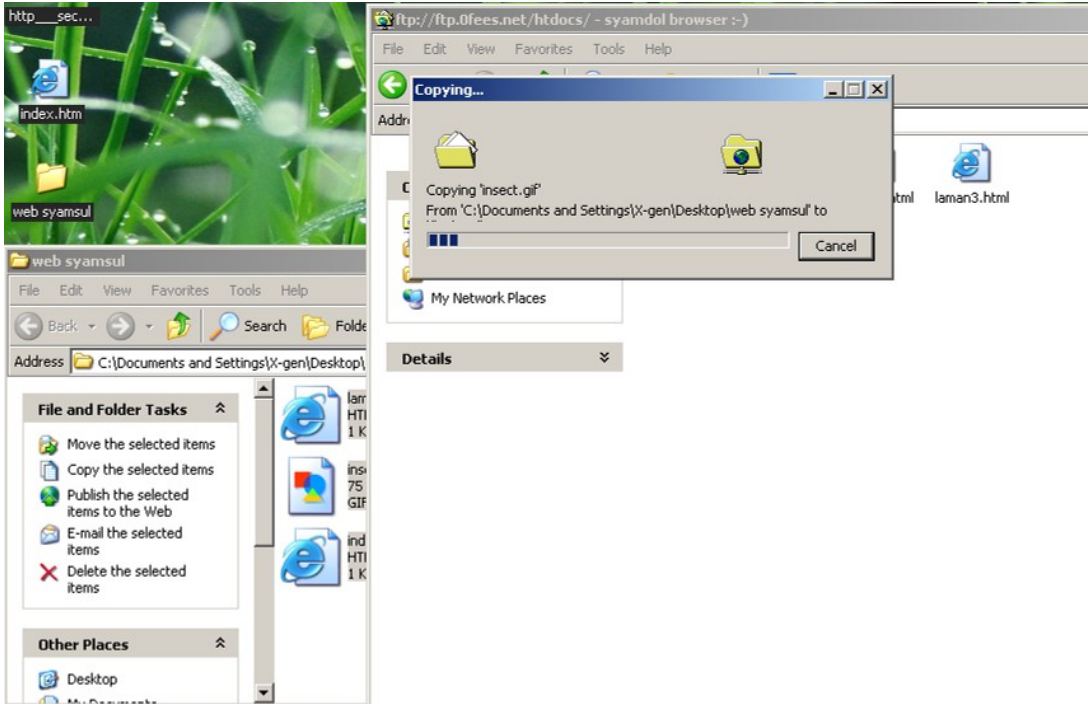

Buka folder htdocs

Salin (copy) fail-fail web anda dengan cara *Drag &Drop* ke dalam folder *htdocs* ini.

Buka alamat web anda untuk ujian (contohnya: <http://banjarhensem.0fees.net> atau alamat barunya <http://www.budakweb.co.cc>)

Pemindahan Berjaya ! Tahniah ☺
